NO TIME ... to rest

Business Traveler

- early go, late returns
- constant travel stress
- Jetlag, sleep deficit

Need:

👉 Fast, effective regeneration in limited time

Executive Leaders

- permanent cognitive load
- mental pressure
- Burnout risk

Need:

👉 Mental recovery & nervous system reset

Decision Makers | Investors | Senior Leaders

high moral responsibility & performance continuity → until old age

Need: 👉 Strengthen health & longevity

Boosting Autophagy

– The Body's Natural Cellular Regeneration Pathway

- Vibration-induced mechanotransduction upregulates autophagy (cellular recycling & repair)
 - Clears damaged proteins/organelles → Reduces inflammation & oxidative stress
 - Improves mitochondrial function & energy efficiency

The Misconception
Psychological Symptoms,
Physical Roots

Light Version

Model "Core" ready to market

The Life Pod: Engineering Longevity and Executive Resilience

A technological solution for executive burnout through physiological regeneration, neuro-sound engineering, and financial accessibility.

THE PROBLEM: EXECUTIVE BURNOUT

Chronic Cognitive Load: Steady accumulation of stress leading to mental fatigue, decreased performance and reduced personal resilience.

Physical Nervous System Exhaustion: Modern lifestyles overload the nervous system leading to persistent stress and sleep problems, becoming a primary precursor to **Burnout**.

THE SCIENCE OF REGENERATION

100 Trillion Synapses & 86 Billion Neurons
The brain drives bio-chemical processes that control the body's self-regulation, and resilience system.

Parasympathetic Reset
Full-body resonance stimulates nerves to shift the body into a 'rest-and-digest' state.

The Serotonin-Melatonin Pathway
Enhances parasympathetic state, deep relaxation, sleep architecture, and brain detoxification.

Autophagy Stimulation
Harnesses the body's own powerful regeneration mechanisms to repair cells and tissues.

THE LIFE POD TECHNOLOGY

German Neuro-Sound Engineering
Developed in Germany, uses a unique profile entirely that to transport precise vibrations throughout the entire nervous system.

VibroTech & ResultTrack
Developed in Germany, uses a unique profile entirely to transport precise vibrations throughout the entire

Vibro-Acoustic Therapy
A non-invasive neuro-sound treatment that uses low-frequency vibration therapy to trigger "full body resonance."

Strategic Partnership Proposal

New Joint Venture Company

- Formation of a new Bio C company in Thailand
- 51% Partner / 49% Founder (Project Owner)
- Individual or corporate shareholding

Contribution Founder = Know-How + License

- System Technology & KnowHow transfer
- Product development experience
- Pre-development & concept work
- LifePod system IT architecture

Investment Offer

- USD 250,000 (approx. THB 8.5 million)
- Investment as corporate capital (not personal)
- Used for finalizing series production and operations

Payment Structure

- Two tranches (50% / 50%)
 - 1st Tranche: 50% upon company incorporation
 - 2nd: 50% with start of LifePod Pro production

Objective

- Establish a wellness company in Thailand
- Position the LifePod as a premium regeneration system for hotels, clinics, and corporates
- Develop a strong local production & sales structure
- Create a platform for Thailand wide expansion

Flexible Investment Structure

The total capital requirement of USD 250,000 (approximately THB 8.5 million) may be allocated among multiple investors.

Place/Project

Investors

Operated by Bio C

When BIO C acts as the operator, the partner only provides the physical space required for the LifePod installation.

BIO C manages the complete operation, including:

- customer management
- booking system and marketing
- daily operation
- technical maintenance

This model keeps the cooperation simple: the location gains an attractive wellness feature without investment or operational effort, while BIO C ensures professional operation and consistent quality.

B

C

Office placement

1-3 months

Target

Measure recovery experience

Purpose

Gather feedback for future implementation

Strategic Mandate

Banker = Project Bank

Participates in investment negotiations to review banking covenants, liquidity requirements and financing structures. Post-closing: full operational banking mandate for BIO C Caring body – corporate accounts

seamless transition into day-to-day operational oversight once funding is closed.

Lawyer = Contract Handling & Regulatory Oversight

Reviews and negotiates all investment-related legal documentation (term sheets, shareholders' agreements, IP licensing clauses while protecting the German-origin technology. Post-closing: ongoing contract lifecycle (supplier agreements, regulatory compliance Thailand)

Next Step
Contact Ulrich Kretzschmar (President) at uk@bio-c.asia or mobile to arrange the first joint briefing and execute mutual NDAs. The goal is to have all partners at the table before the first serious investor discussion.

Accountant = International Tax Advisory & Full Controlling

Validates financial models and projections for investors during due diligence and term-sheet phase. Post-closing: end-to-end financial operations – monthly P&L, cash-flow reporting, international tax structuring (Thailand corporate tax, VAT, withholding tax, transfer pricing), plus operational controlling (cost centres, margin tracking, KPI dashboards and monthly management reporting)

Pod Production

For PRODUCTION COMPANY:

Shell Production - Design & Assembly

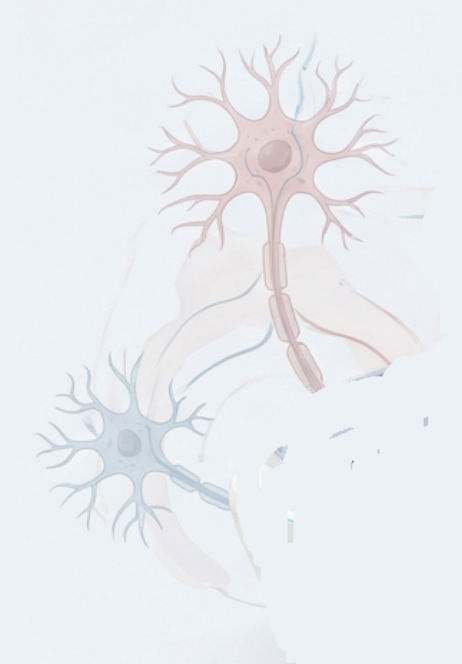

Content suggestions:

Shell design specifications (dimensions, weight)

Material selection (durability, thermal properties)

Assembly process steps

Quality assurance standards

LifePod Features

A Complete Corporate Wellness Ecosystem

A managed service platform, not just a standalone device

VibroTech (Hardware)

Plug & Play

Financial Planning

Guest Target Profit

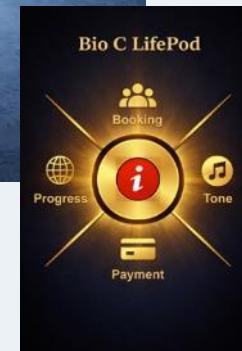

Session Booking System

no admin needed

ResultTrack

personalized result tracking

Business Integration & Application Scenarios

Executives

High-priority stress regulation and cognitive recovery

Employees

Accessible burnout prevention

Guests

Unique client amenity

Installation & Logistics

Transport

Compact, modular design
Fits standard transport vehicles
No special handling required

☐ **Elevator Access**

Compatible with standard elevators
No structural modifications needed
Smooth internal transport

Setup

Plug & Play installation
No construction work
No downtime for corporate operations

Time

Delivery to operation within hours
Minimal staff involvement
Immediate readiness

Regeneration Cells Introduction

Mechanotransduction is:

- ✓ Scientifically validated
- ✓ Established in physiotherapy
- ✓ Standard in orthopedics
- ✗ No “miracle cure” claims
- ✗ Not a replacement for medical treatment

Mechanical stimulus
→ Cellular response
→ Regeneration

This triggers:

- ✓ Calcium signaling
- ✓ Gene activation
- ✓ Protein production
- ✓ Cell repair
- ✓ Inflammation reduction

water drop penetrated with 432 Hz

LfePod uses calibrated vibro-acoustic stimulation to trigger mechanotransduction at the cellular level, initiating bioelectric signaling that influences the nervous and neuroendocrine systems and promotes regenerative biochemical processes.

Powered by

Solar Panel or Power Bank

- 20 Watt solar panel needs direct sun light do generate power
- 30000Mah. Power bank
- There Are Plugs & Cables Built-In.

Solar Panel and Power Bank Battery easy to handle, low voltage well used for mobile phones as well.

Power Bank holds 5 days operating the LifePod.

Partner with Us

Integrate the Bio C LifePod into your corporate wellness strategy today.
